Store your RV or personal vehicle in your carport and maintain it's cleanliness.

Entertain on your patio or porch without those pesky insects.

Motorize your pool cage to create a useable room outdoors.

Enclose your entire home with motorized screens for your own unique look.

New Construction Or Remodel.

Hide the units into cavities in the wall when constructing decorative arches.

During new construction the system can be concealed out of view using our Recessed application.

Can be used in conjunction with motorized hurricane shutters or Screens for a Dual System.

ENHANCE & PROTECT YOUR OUTDOOR LIVING SPACES

PROUDLY CRAFTED IN AMERICA

Progressive Screens was founded in 2002 by Arthur James, Jr. Arthur has extensive knowledge of the motorized screen industry, and has spent the last 15 years perfecting our motorized system to be the best system available, at an affordable price. Progressive Screens is one of the pioneers of the industry and will continue to lead the market innovation and design. All of our systems are proudly manufactured in the USA and our headquarters is based in Sarasota, FL.

Progressive Screens is proud to introduce our new **MagnaTrack System** (Patent Pending). The **MagnaTrack System** is innovative in design and works on a dual pull magnetic system. The side track design eliminates almost 98% of any common service issues associated with other motorized screens and Guaranteed to outperform any other system available! The magnetic side tracks combined with our proprietary interlock provides smooth, consistent deployment of the screen and constant tension on the screen after deployment, keeping the screen taught and secure.

Our **Commercial System** is designed to be used on outdoor seating areas of restaurants, hotels, casinos, resorts, special event areas, and wedding venues. This system is designed to withstand the inclement conditions and deploy on demand to protect your clients and enhance their experience. Our commercial system is available with vinyl window or screen only. The system is totally Customizable to fit your needs, design and requirements.

Every product we produce is hand made, and attention to detail is paramount. The product goes through several Quality Control inspections to insure every system is built to your specifications and meets our stringent guidelines as a World Class Motorized Screen System. As a family owned and operated business every client is important to us and our friendly customer service representatives will be glad to assist you with any questions you might have.

INNOVATION

PROGRESSIVE SCREENS IS PROUD TO INTRODUCE OUR NEW MAGNATRACK SYSTEM

The Magna Track can be used in New construction as a Recessed system, retro fit applications or existing residential applications, and commercial applications such as restaurants, hotels, or hospitality application.

The Magna Track enhances the performance of our Motorized Screens system for both commercial and residential applications.

The MagnaTracks main difference is the adjust ability of the tracks during deployment of the screen system.

The Magna Track is self tensioning and designed to use dual magnetic pull from Neo magnets interlocked into the track housing as well as the adjustable track insert.

The self tensioning component of the system overcomes the ineffectiveness of the current fixed track (permanently secured by fasteners) by allowing the screen to expand while under wind pressure / separating the magnets, and after the pressure subsides the magnets and magnetic pull will tension the screen for an aesthetically tight looking screen. It will also allow for expansion and contraction of the screen/shade material as well as a screen/Vinyl window insert combination during deployment of the screen and adjust accordingly to avoid hang up or jamming like fixed track systems might.

The MagnaTrack will give us a competitive edge in the industry and also reduce or eliminate almost all service issues inherent of all fixed track systems currently available.

PATENT PENDING, THE MAGNATRACK SYSTEM IS EXCLUSIVE TO PROGRESSIVE SCREENS*

*and authorized dealers across the country

MAGNATRACK
PATENT PENDING

THE RIGHT FIT FOR YOUR SPACE

MADE TO YOUR SPECIFICATIONS

Motorized retractable screens are built and customizable for each building project, so they will enhance your outdoor living area and maintain the aesthetic appeal of your home. Our motorized retractable screens can be recessed from view by integrating with the building structure or surface-mounted onto existing structures.

Progressive's Motorized Screen System can be integrated and installed on any type of building materials, including wood, brick, stucco, natural stone, and concrete.

CUSTOM SIZES

Our motorized screens are custom made for your home – which means they'll fit perfectly with your outdoor or indoor living spaces. We can accommodate openings ranging from 3'-30' wide and 3'-24' high.

SEAM HEIGHT

Please refer to seam height chart to determine the right fabric selection based on the width and height of your opening. If the opening is wider or taller than the height of the fabric is woven to, then it would require us to seam/sew two sections of the material together to create the perfect size screen for your application. Your authorized Progressive Screens dealer will be happy to assist you during this process.

PROTECTING MY HOME FROM UV RAYS

All of our fabrics block UV rays to various extents. Our privacy and solar meshes can all block between 80%-97% of UV rays from entering your home. Insect and solar meshes can also provide as much as 50% UV protection.

CREATING CLIMATE CONTROLLED SPACES

Clear vinyl walls create the perfect transitional living space to entertain your guests throughout the year. In the colder months, studies have shown that it reduces heat loss, while in the warm months it helps to keep your living space cool. These screens can be added by themselves, or as part of a dual roller system that lets you choose between the clear vinyl or one of our other mesh options.

INCREASING AIRFLOW & PROTECTING MY HOME FROM INSECTS

If bug-free airflow through your home is important – stick to meshes with high openness factors such as our insect meshes. The higher the openness factor, the easier it is for air and light to pass through. Protection Screen Insects.

Insect mesh is ideal where bugs are a problem, this mesh type also reduces up to 50% of UV rays. Insect mesh also features a higher openness factor, which gives you more ventilation and visibility to the outside. Our 17/20 mesh will keep out no-seams and other tiny insects. Special meshes to deal with no seams and other tiny insects are available.

INCREASING PRIVACY & SHADING MY HOME

Privacy mesh and fabrics block between 80-100% of UV rays, and is available in multiple screen colors and openness factors depending on your airflow requirements.

White and light colored fabrics are reflective of light and provide complete privacy during the day but at night they have a reverse effect.

Black and dark colors are absorbent of light and provide the best visibility day and night.

To get total privacy day and night a 100% Black Out material would be required (No visibility).

Solar mesh types reduce heat and glare by up to 97% as well as keeping insects out. Solar mesh is perfect for keeping your home cooler and protecting your carpets, drapes and furniture from fading.

EASY OPERATION

REMOTE CONTROLS

Several types of remotes are available for the system. Hand held remotes are available in single channel, 5 channel, and 16 channel options. In wall remotes are available in single channel and 5 channel options.

MYLINK™ APP

The Somfy myLink™ App offers convenient control with a smartphone or tablet. It consists of a simple plug-in device and free app that transforms the experience users have with their motorized solutions.

The myLink™ puts you in control, so that you can operate your motorized solutions whether you're home or not. At work and realized you forgot to close your shades for the day? Not a problem. With a simple tap of the myLink app, you can close all your shades.

WHY PROGRESSIVE?

QUALITY

We pride ourselves on fast and accurate shipments. Most orders will be produced and shipped within 2-3 weeks. Every shipment is inspected at each step of production. A final quality control inspection ensures that only the finest quality product is shipped.

VALUE

Every component of your motorized screen is designed to enhance the performance of the system and built to withstand the most rigorous conditions! Thus providing a World Class product at an affordable price.

FEATURES & BENEFITS

Extruded aluminum housing, tracks, and weight bar for durability.

Stainless steel fasteners means no rust.

We're going green! Solar screens reduce UV rays and keep cooling and heating costs to a minimum!

Super heavy weight bar for smooth operation and no hang ups when coming down.

Felt pile under weight bar seals better against grout lines, pavers, and uneven surfaces.

Vinyl coated screen materials can be easily cleaned and are more resistant to breakage.

Double stitched zippers on top and bottom of screen for strength, durability, and complete insect control.

Double felt system on inside of hood cover and back of hood brushes off dirt and debris, and keeps unwanted insects from crawling from the outside in.

Powder coated aluminum ensures no chipping, peeling, or bubbling of the paint.

Proprietary interlock and our New MagnaTrack systems provide incomparable performance, and reduces almost all potential service issues inherent of other motorized screen systems.

Units plug directly into a 110 volt outlet, meaning no hard wiring or electricians required.

Stylish and modern accessories to accommodate every type of install.

Manufactured up to 30 wide and 24 tall!
(Certain restrictions apply)

Interfaces (dry contact and RTS) allow motorization via home automation systems with the touch of a button.

Somfy My Link is available for those who want the freedom from remotes and want to control our screens from your mobile device.

STRATAGLASS CARE & MAINTENANCE

RECOMMENDED PRODUCTS FOR CLEANING:

IMAR Products. IMAR Strataglass Protective Polish, IMAR Strataglass Protective Cleaner, and mild soap (preferably) IMAR Yacht Soap Concentrate). Use of harsh cleaners like "Simple Green, Glass cleaners with Ammonia, and Orpine" will dull the curtains quickly. Using any other product(s) void the factory warranty.

303 Clear Vinyl Protective Cleaner is also approved for cleaning of Vinyl panels. 303 Clear Vinyl protectant offers superior protection against the harmful effects of UV rays. This product is all you need to safely clean and protect against yellowing and cracking of vinyl, clear vinyl, leaving a non-streaking finish.

- NEVER use a wash-and-wax product on Vinyl panels.
- WARNING – Use of Rain-X, Pledge, or Plexus on your Vinyl panels will appear to work for a short time but then dulls the surface and presents an "Orange Peel" effect. Do not use any of these products.
- Use of cleaners, polishes, scratch removers, or any other product made for regular, uncoated vinyl will damage your vinyl panels. Do not use these products.
- DO NOT HANDLE VINYL WITH SUNSCREEN ON YOUR HANDS! This will permanently cloud the vinyl where handled.

GENERAL MAINTENANCE:

FOR THE CUSTOMER: We recommend using IMAR Strataglass protective Polish or 303 Clear Vinyl Protectant or cleaner every 1 to 2 months.

NOTE: All new vinyl can easily get impressions. It is recommended new enclosures be left in place to the extent possible. Vinyl "seasons" over time and becomes less impressionable. Roll all curtains down and fasten in place nightly to keep perfect appearance.

CLEANING: Apply the soapy water to the clear vinyl section of the curtain with special purpose washing mitt or soft cotton cloths. Thoroughly rinse the soapy solution with fresh water and completely dry the curtains with a high quality chamois. After washing the curtains, apply 303 or IMAR Strataglass Protective Polish sparingly with small, light circular motions using a soft cotton cloth. Allow the polish to dry and then remove with a clean soft cotton cloth. Finally, lightly buff to a sparkling shine. For routine maintenance between polishing, use IMAR Strataglass Protective Cleaner. Insure the clear vinyl panels are free of abrasives. Very lightly mist a soft cotton cloth. Lightly and briskly rub a manageable sized area and then lightly buff dry with another clean cloth.

RESTORING: Some actual damage cannot truly be repaired. If 303 or IMAR Protective Polish cannot restore the clarity and shine, it may be time to consider replacing the enclosures.

WARRANTY

LIMITED LIFETIME WARRANTY

Progressive Screens, the manufacturer, guarantees the material and workmanship of its products to be of excellent quality. All Materials are carefully selected to withstand most weather elements and breakage under normal use. The warranty does not cover claims originated from faulty installations, hail, flood, fire, harmful chemicals and fumes, misuse, abuse, fading, chalking, oxidization, erosion of paint, acts of God, or causes beyond control of the manufacturer. This warranty is for the benefit of the original purchaser and is not transferable. The lifetime material warranty applies to aluminum components only.

5 YEAR WARRANTY

Progressive Screens warrants the electrical motors for a period of 5 years, commencing from the date of sale from Progressive Screen Systems, against failure under expected normal use. Warranty is void if the electrical motor is exposed to water, acts of God, or abnormal conditions, including faulty installation.

2 YEAR WARRANTY

Progressive Screens warrants the electronic components such as radio transmitters and receivers for a period of 2 year, commencing from the date of sale from Progressive Screens against failure under expected normal use. Warranty is void if the electronic component is exposed to water, acts of God, or abnormal conditions.

SCREEN & VINYL WARRANTY

Progressive Screens warrants fabrics supplied from Twitchell have a 10-year limited warranty from the original date of purchase. The warranty covers defects of workmanship, materials, or excessive loss of strength in normal conditions, including sunlight, rot, mildew, or atmospheric chemicals that might render it unserviceable. Improper use, abuse, or use of harsh chemicals will void warranty. Fabrics not manufactured by Twitchell might have different warranties associated. Please see catalog or website for full details and warranty info.

Progressive Screens warrants our clear vinyl windows for (1) year. The warranty specifically covers manufactures defects in the material or workmanship of stitching the vinyl windows to the surrounding material. Any defects in the Vinyl panels needs to be noted upon installation of the motorized system. Discoloring, yellowing, orange-peel, or scratches discovered in the material after the install is complete is not covered and typically caused by use of improper cleaning solutions. Please see catalog or website for cleaning instructions, care and maintenance

LIMITATIONS OF WARRANTIES

Progressive Screens is not responsible for indirect, punitive, special, incidental, or consequential damages or losses that anyone may suffer or incur in connection with this product or it's use. Any warranties implied by law, including those of merchantability and fitness for the use or for particular purpose are limited to materials only in duration of 1 year express warranty hereunder. Some states do not allow limitations on how long a warranty lasts, therefore in those states the limitations are not applicable to the purchaser. This warranty does not cover screen mesh including incidental, misuse, or faulty installation damage. This warranty further does not cover installation costs, removal costs, service calls, and shipping costs of all materials covered in above limited warranties.
